Last chance to apply Fertilome All Seasons Weed Control

Well here we are in mid-April and I am positive some of you have put off applying *Fertilome All Seasons Weed Control*. Human nature for some of us is to put things off until the last minute possible.

About a month ago I told you why you needed to use *Fertilome All Seasons Weed Control*. We told you it lasts about six months compared to the old products that lasted about 60 days. Some of that old product is still sold today in other stores. That is why those products are inexpensive; they don't last as long, nor are they as effective.

We told you with the old products you needed to time the application just right and you should reapply in early June, which nobody ever did. We used to sell lots of post emergent sticker spray in late summer because the old product never lasted all summer. Today, because of *Fertilome All Seasons Weed Control*, we sell very little of our post emergent sticker spray in late summer.

Your window of opportunity is closing here in a couple of weeks. You need to apply now! Put on with a spreader and water in.

If I can help you in some way call me and let me know how. Do you need me to leave a bag outside the front door for you to pick up after we lock up? Can I deliver a bag to your house?

We are having our Spring Show Case this weekend, April 15-18. We are also open this Sunday 1-5pm for the first time. How can we help you? We grow our own and that's the difference.
